SPECIAL TEN CENT SALE
OF 1 YEAR OLD
ROSE PLANTS

From April 15th., to May 20th., 1916

**SUMMER PROPAGATED,
FALL GROWN,
WINTER RESTED,
NATURES WAY.**

These Everblooming Roses are all on their own roots, Propagated during the summer and grown during the fall and rested during the winter in cold houses, this is nature's way for them to do, and being well rested they start to grow early, they are ready to start off to growing as soon as planted in the rose garden. They are fine, thrifty growing plants in pots and in shipping the soil is all left on the plants to give them a little check in transplanting as possible.

They Will Give An Abundance Of Roses This Summer.

PARCEL POST. These Roses are well wrapped in paper after taking them out of the pots, so they can be sent by Parcel Post and they will be sent that way when requested and postage is sent.

EXPRESS. The Express Co's., handle plants with more care than the mail so that it is usually advisable to send them by Express where it is convenient, we always send by Express unless otherwise directed, but in many cases it is more convenient to have them come by Parcel Post, the expence is about the same.

NOTICE. We have classified our Roses by color to help you in selecting. Those marked * are new, scarce sorts that sell higher, and can only allow you to select $\frac{1}{2}$ of your order of these kinds, the other half to be of the standard-sorts, not marked with a *.

be disappointed if you do not find

this rose among your collection,
so don't fail to order one or more
of them.

Prince E. C. D'Arenberg, brilliant,
fiery scarlet shading to maroon,
a seedling of Richmond, and like
its parent very free bloomer; fine.
Sun Burst, the best yellow rose to
date; words cannot do this beau-
tiful rose justice. We have had a
constant supply of this beautiful
yellow rose every day and have
never had a rose that was as uni-
versally admired.

White Shawyer, one of the most
beautiful white roses, as large as
white Killarney and more dura-
